Version:	v1.1
Approved By:	HWE ICB Commissioning Committee
Date of Approval:	1st July 2022
Date of Review:	1st July 2024

Policy: Biological Mesh

Biological meshes have been used in a variety of reconstructive surgical procedures. The Priorities Forum has considered the evidence of clinical and cost-effectiveness for use of Biological Mesh in complex and contaminated abdominal wall repair.

Use of biological mesh in abdominal wall hernia repair or closure of laparostomy will not routinely be separately funded as an exclusion from payment by results, due to insufficient evidence of clinical or cost effectiveness.

All funding requests will only be considered on a case by case basis through the ICB individual funding requests department.

Human Rights and Equalities Legislation has been considered.

Patients who are not eligible for treatment under this policy may be considered on an individual basis where their GP or consultant believes exceptional circumstances exist that warrant deviation from the rule of this policy. Individual cases will be reviewed as per the ICB policy.

Change History:

Version	Date	Reviewer(s)	Revision Description
V1.1	November 2023	M Skerry	Removed reference to CCG

DOCUMENT CONTROL

This is a controlled document. Whilst this document may be printed, the electronic version posted on the intranet is the controlled copy. Any printed copies of this document are not controlled. As a controlled document, this document should not be saved onto local or network drives but should always be accessed from the website.

 *Do you really need to print this document?*

Please consider the environment before you print this document and where copies should be printed double-sided. Please also consider setting the Page Range in the Print properties, when relevant to do so, to avoid printing the policy in its entirety.
